Technical workshop for GCF project: Climate change and climate change impacts on São Tomé and Príncipe with a focus on fishery and tourism sectors in a Blue Economy context

Sao Tome and Principe, November/December 2025

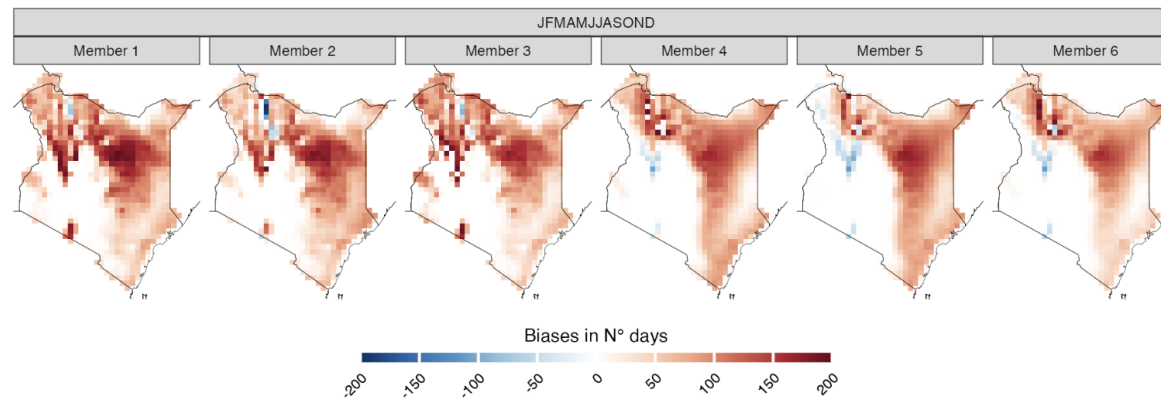

TOOLS FOR CLIMATE AND SECTORAL RISK ANALYSES

By: Riccardo Soldan

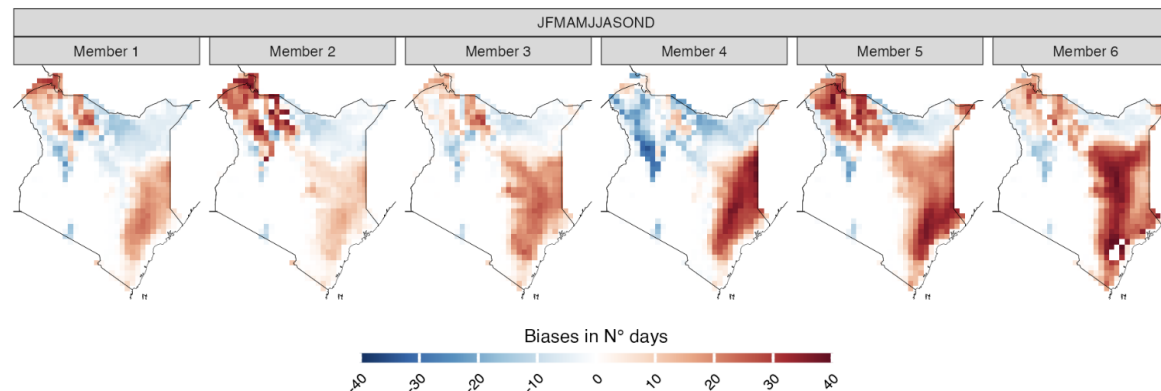

How do we get to this output?

No bias correction

Note the scale is different from the other plots because biases are much higher

After bias correction-scaling method

How do we get the climate data from

Earth System Grid Federation (ESGF)

Copernicus Climate Data Store (CDS)

What do we need to know to analyse climate data

Environments

Programming

Specific libraries

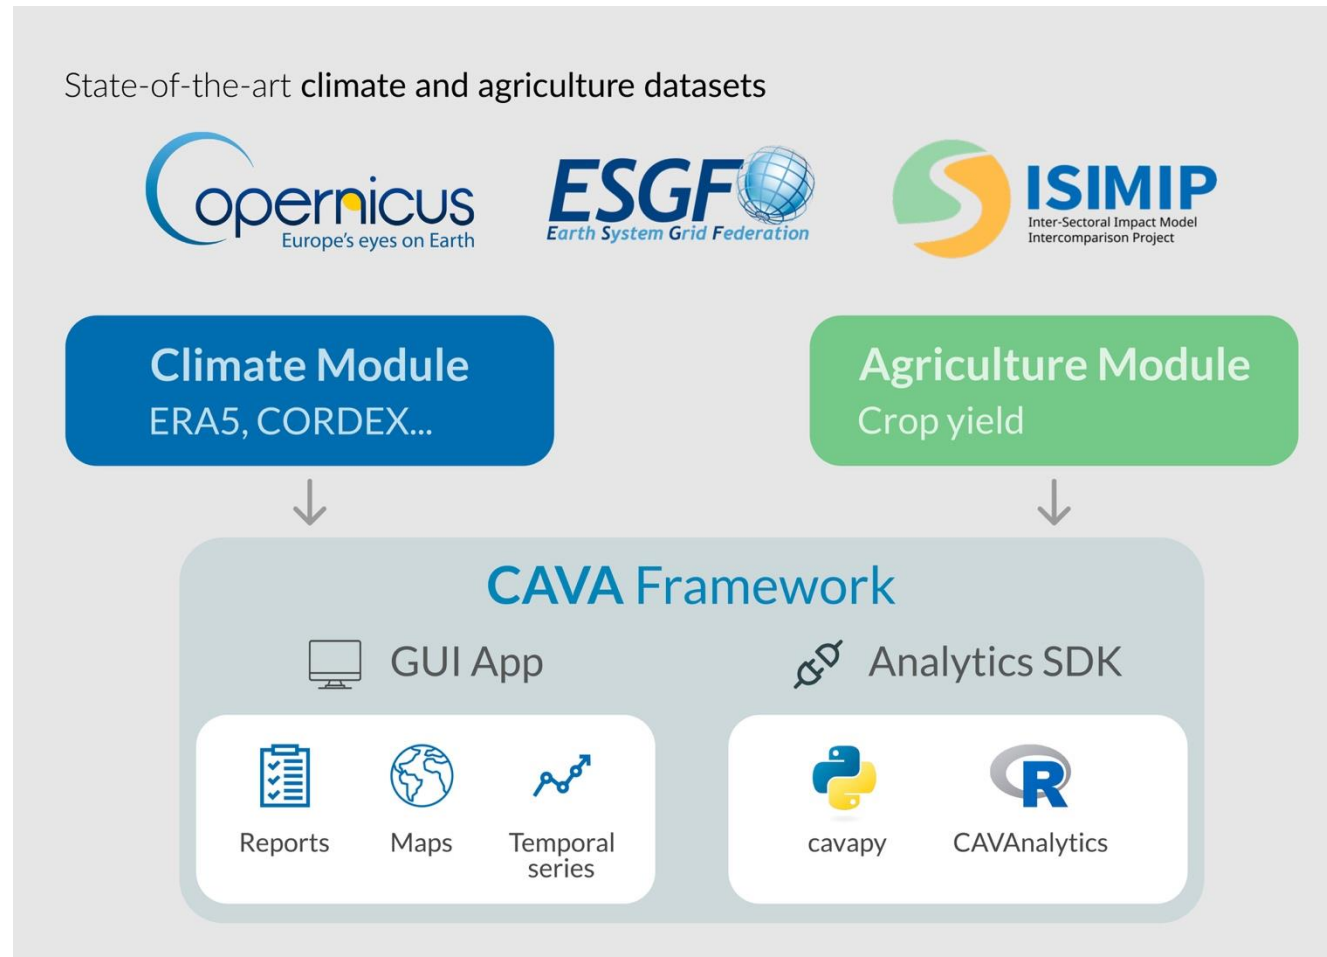

[cdo \(Climate Data Operator\)](#)

[Xarray](#)

[Xclim](#)

[Climate4R](#)
