

Aden (Yemen), 2 Dec - 4 Dec., 2025

Session IV. CIPA findings

Jorge Alvar-Beltrán: jorge.alvarbeltran@fao.org
Natural Resources Officer (Agrometeorology)

**Office of Climate Change, Biodiversity and environment
(OCB, FAO)**

Presentation plan: Session IV

1. Historical climate: trends and extremes
2. Future climate: trends and extremes

Climate hazards

Climate hazards refer to the potential occurrence of a natural or human-induced physical event or trend that may result in loss of life, injury, or other health impacts, as well as damage and loss to property, infrastructure, livelihoods, service provision, ecosystems, and environmental resources.

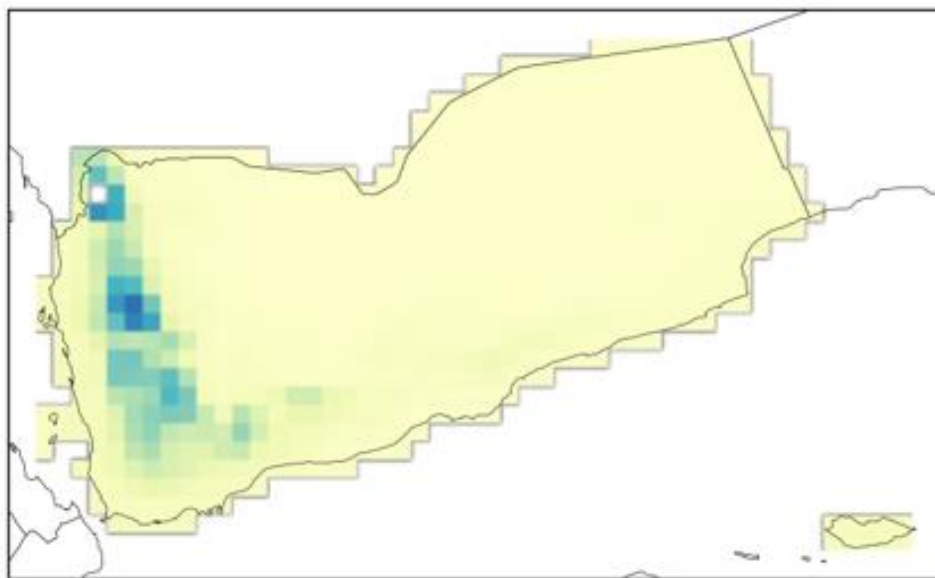

Indicators	Code	Indicator name	Description	Units
Precipitation (PRCP)	PRCPTOT	Annual total wet-day PRCP	Annual total PRCP from wet days (days with PRCP > 1 mm)	mm
	DD	Number of dry days	Annual count of days with PRCP <1mm	Days
	CDD	Consecutive dry days	Consecutive dry days (maximum number of consecutive days with PRCP <1 mm)	Days
	R20	Number of heavy PRCP days	Annual count of days when PRCP > 20 mm	Days
	CWD	Consecutive wet days	Consecutive wet days (maximum number of consecutive days with PRCP > 1 mm)	Days
Temperature	SU	Summer days	Annual count of days with TX (daily maximum) > 25°C	Days
	TR	Tropical nights	Annual count of days with TN (daily minimum) > 20°C	Days
	HWVS	Heatwaves	Annual count of events with TX (daily maximum) > 35°C for 3 or more consecutive days	Events

Historical climate: trends and extremes

Historical climate (1980-2005): precipitation-based indicators

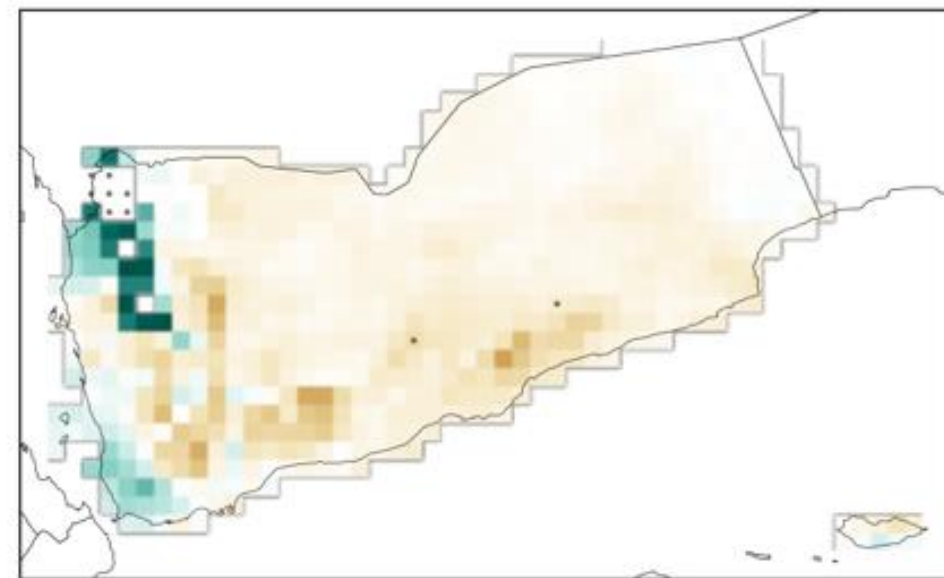

ANNUAL RAINFALL

Historical climate (1980-2005): precipitation-based indicators

HEAVY RAIN

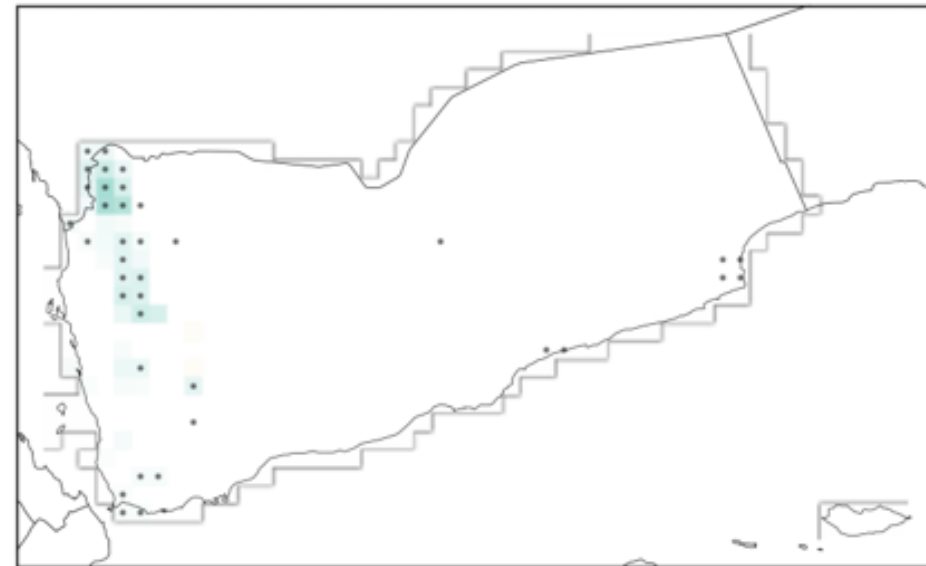

Annual count of days when
PRCP > 20 mm

Nº days

Change (days/year) in annual count
of days when PRCP > 20 mm

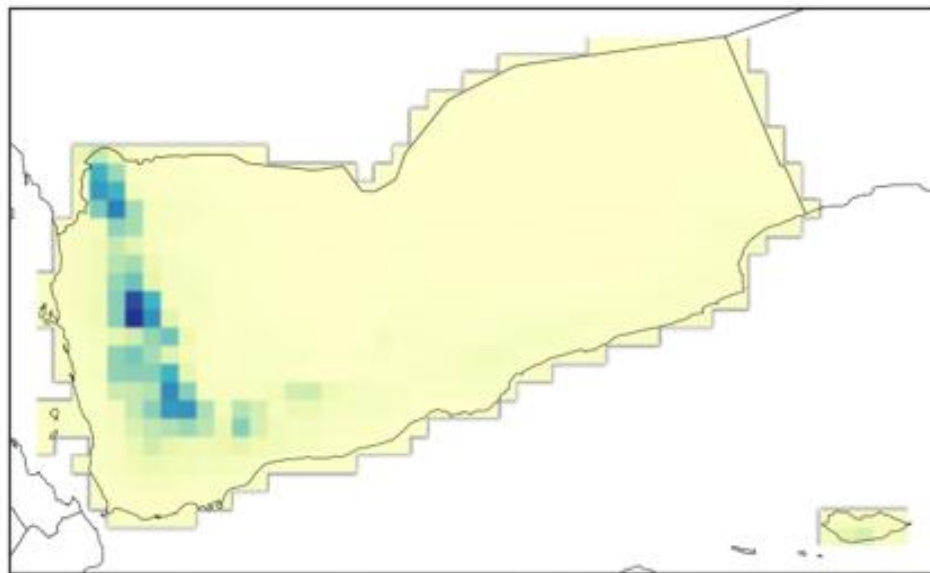

Nº days/year

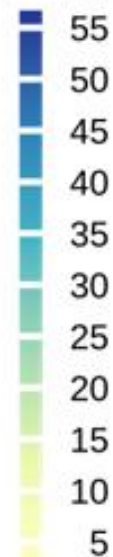

Historical climate (1980-2005): precipitation-based indicators

CONSECUTIVE WET DAYS

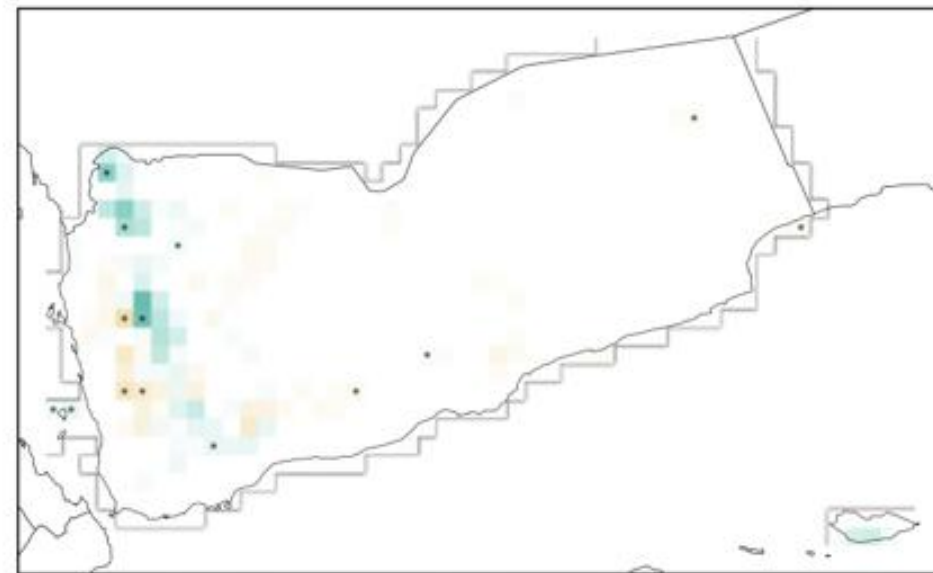

Consecutive wet days (maximum number of consecutive days with PRCP > 1 mm)

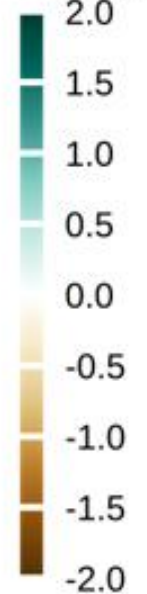

N° days

Change (days/year) in **consecutive wet days** (maximum number of consecutive days with PRCP > 1 mm)

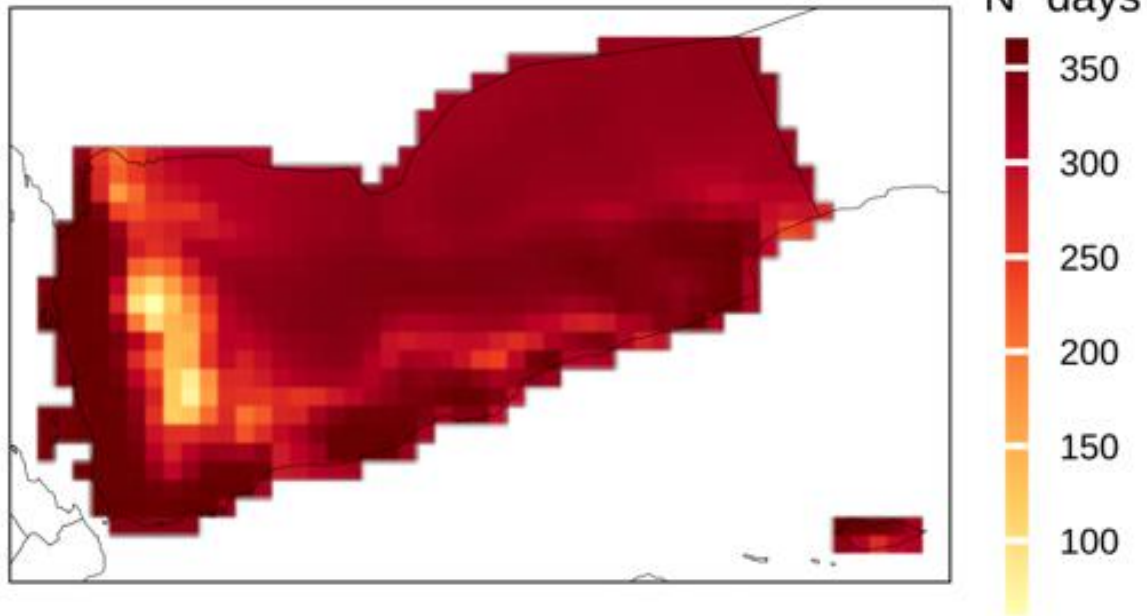

N° days/year

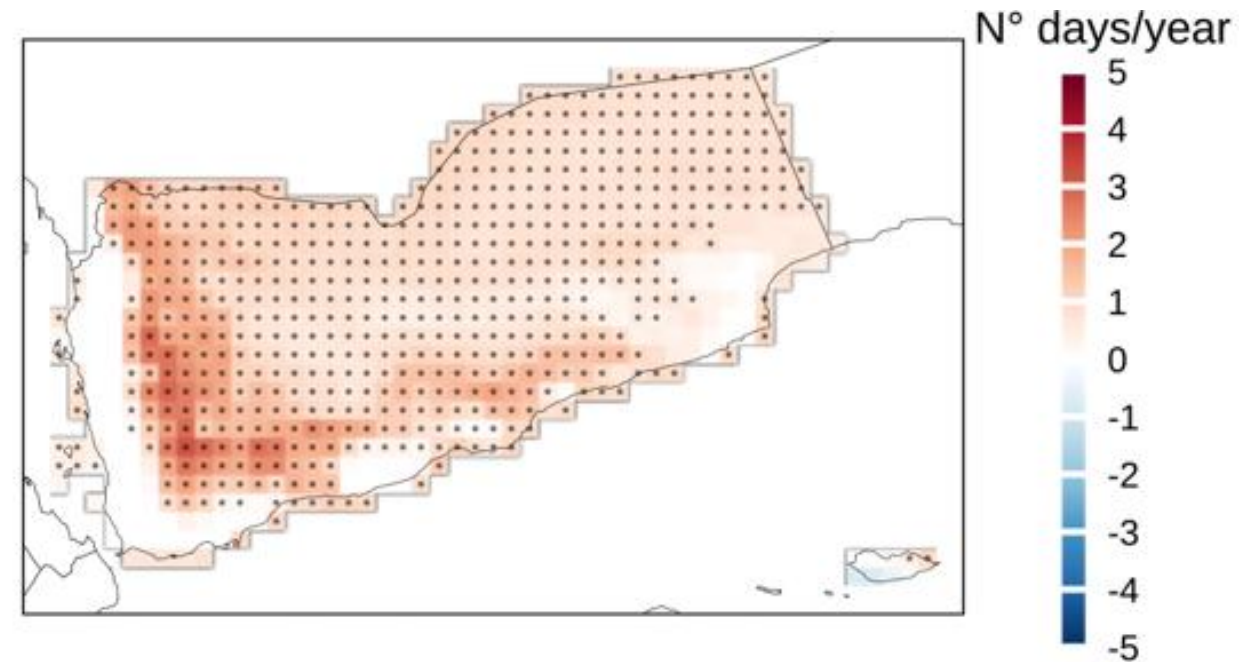

Historical climate (1980-2005): temperature-based indicators

SUMMER DAYS

Annual count of days with TX
(daily maximum) $> 25^{\circ}\text{C}$

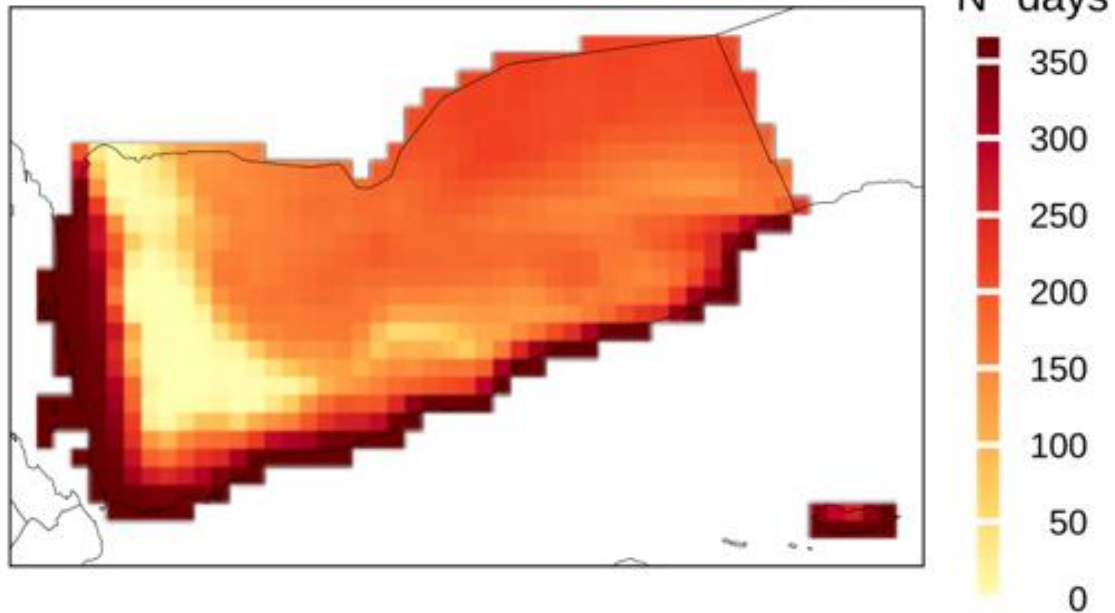

Change (days/year) in annual count of
days with TX (daily maximum) $> 25^{\circ}\text{C}$

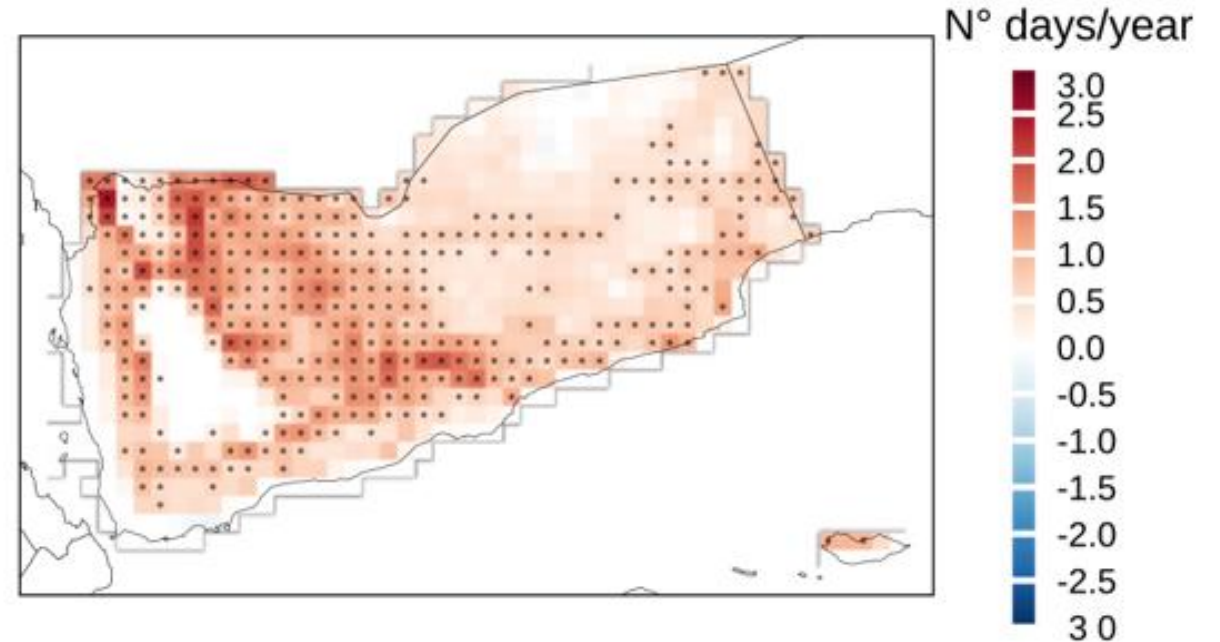

Historical climate (1980-2005): temperature-based indicators

TROPICAL NIGHTS

Annual count of days with TN
(daily minimum) $> 20^{\circ}\text{C}$

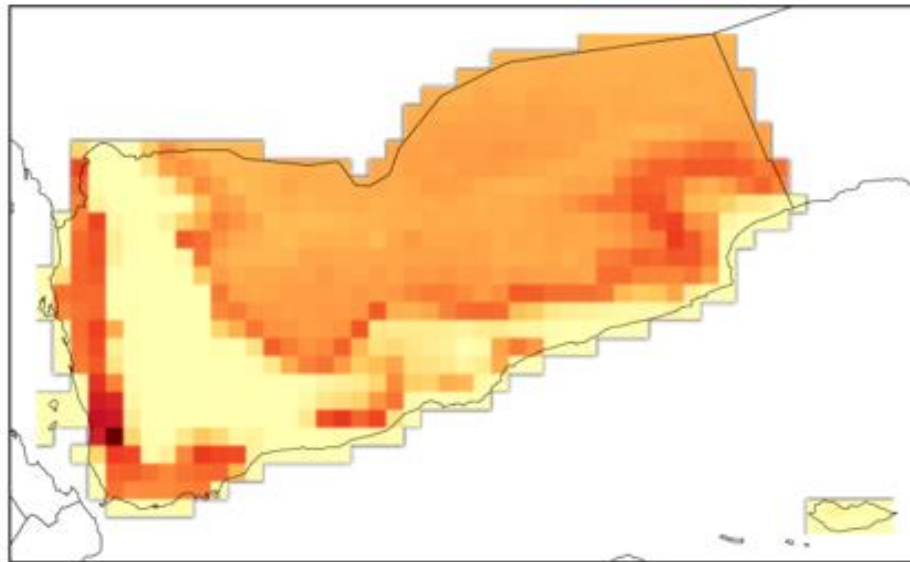

Change (days/year) in annual count of
days with TN (daily minimum) $> 20^{\circ}\text{C}$

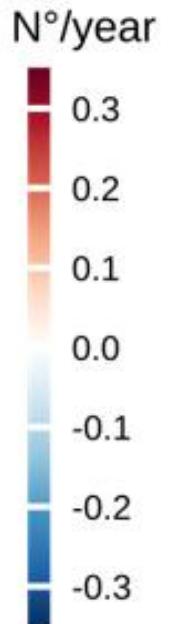

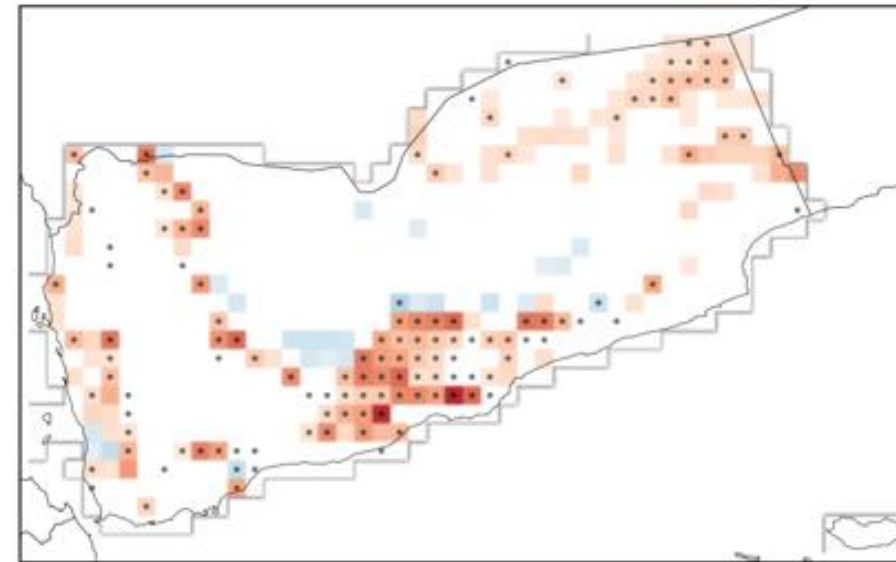

Historical climate (1980-2005): temperature-based indicators

HEATWAVES

Annual count of events with TX (daily maximum) $> 35^{\circ}\text{C}$ for 3 or more consecutive days

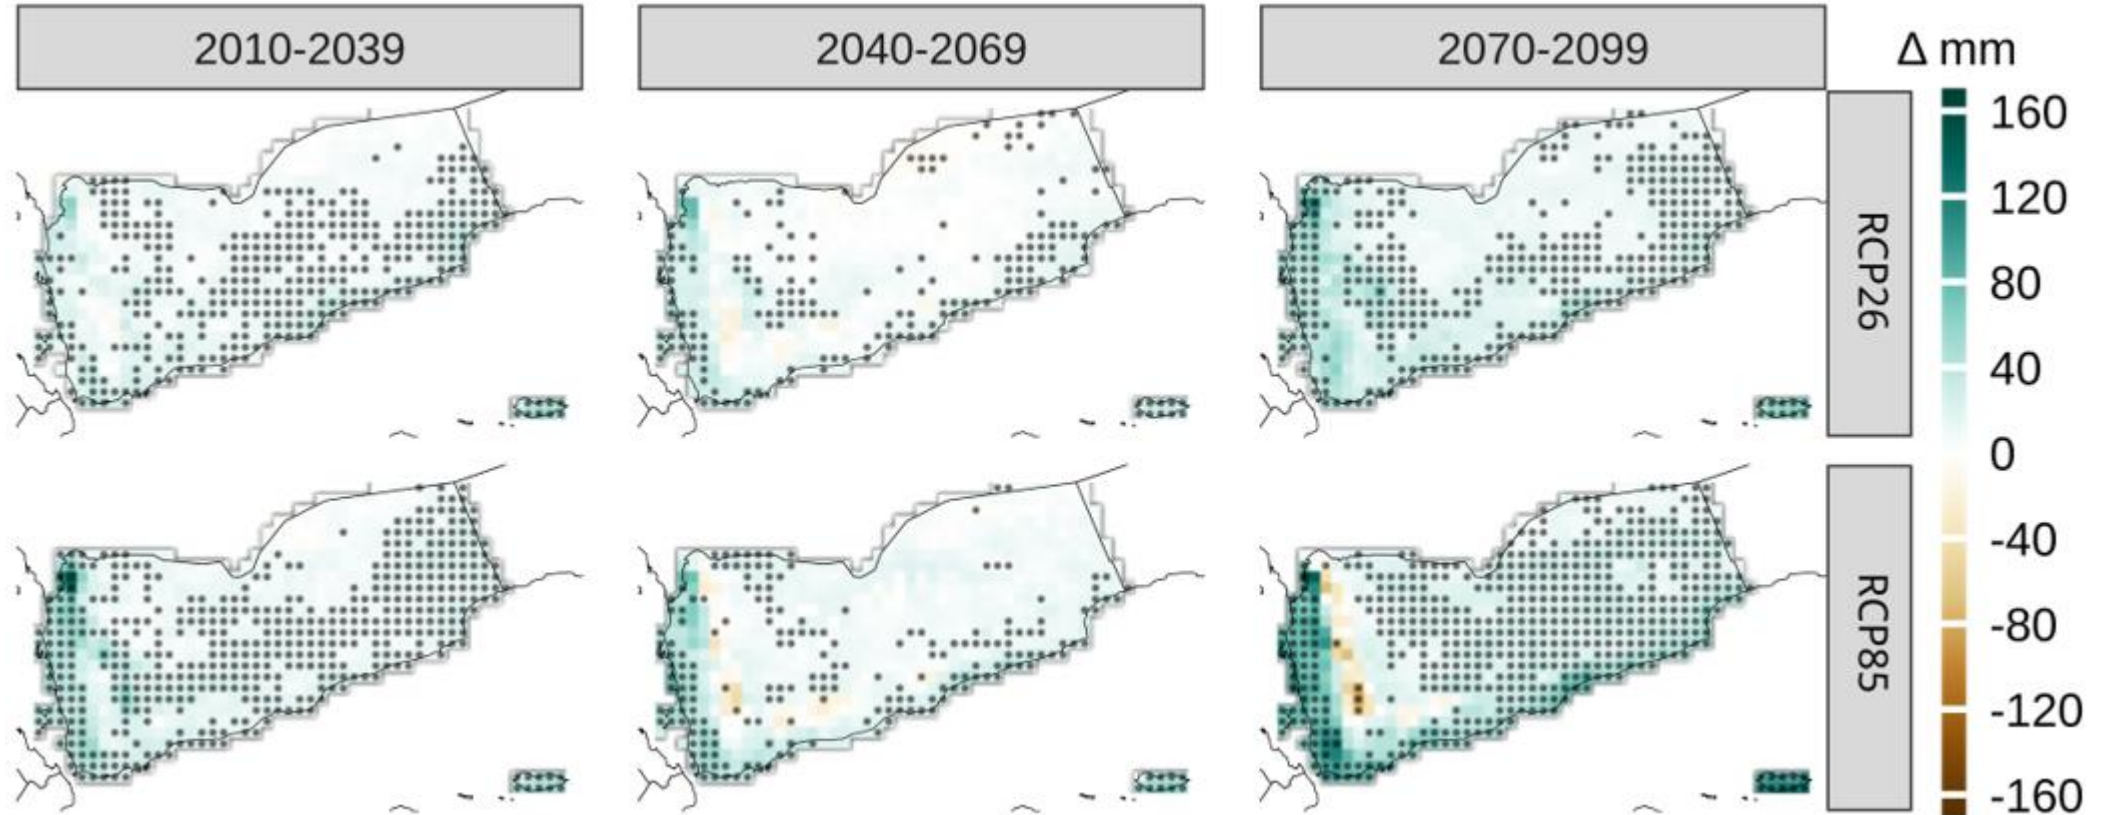

Change (events/year) in annual count of events with TX (daily maximum) $> 35^{\circ}\text{C}$ for 3 or more consecutive days

Future climate: trends and extremes

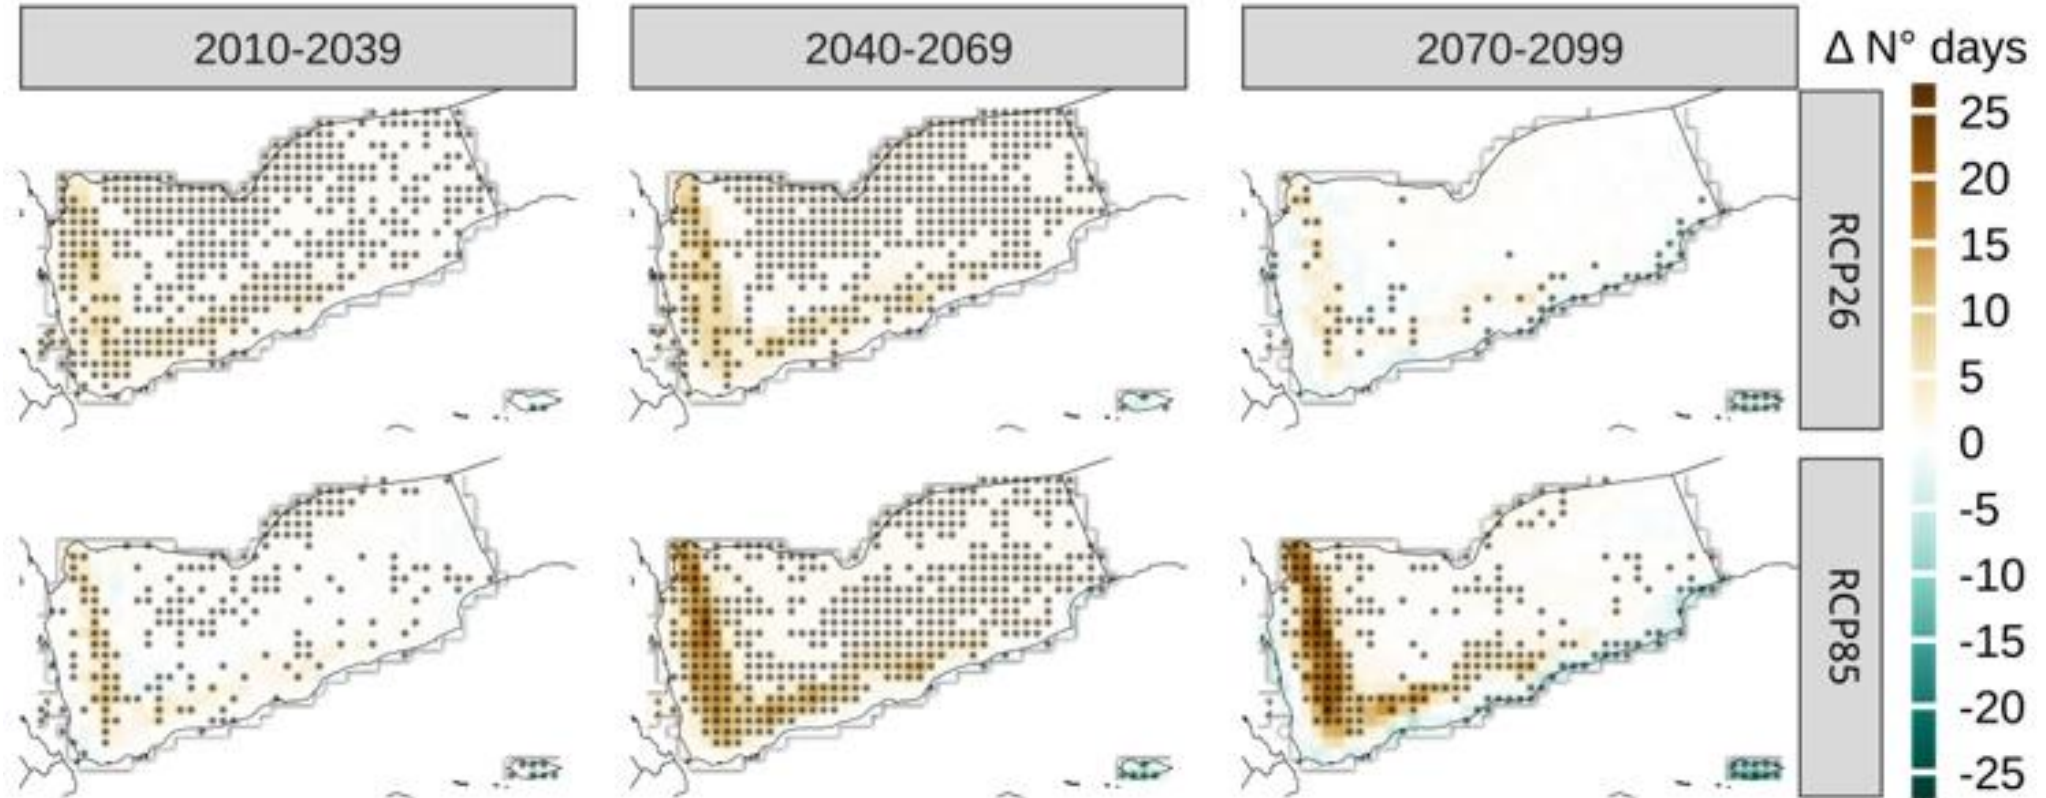

Future climate (2010-2099): precipitation-based indicators

ANNUAL RAINFALL

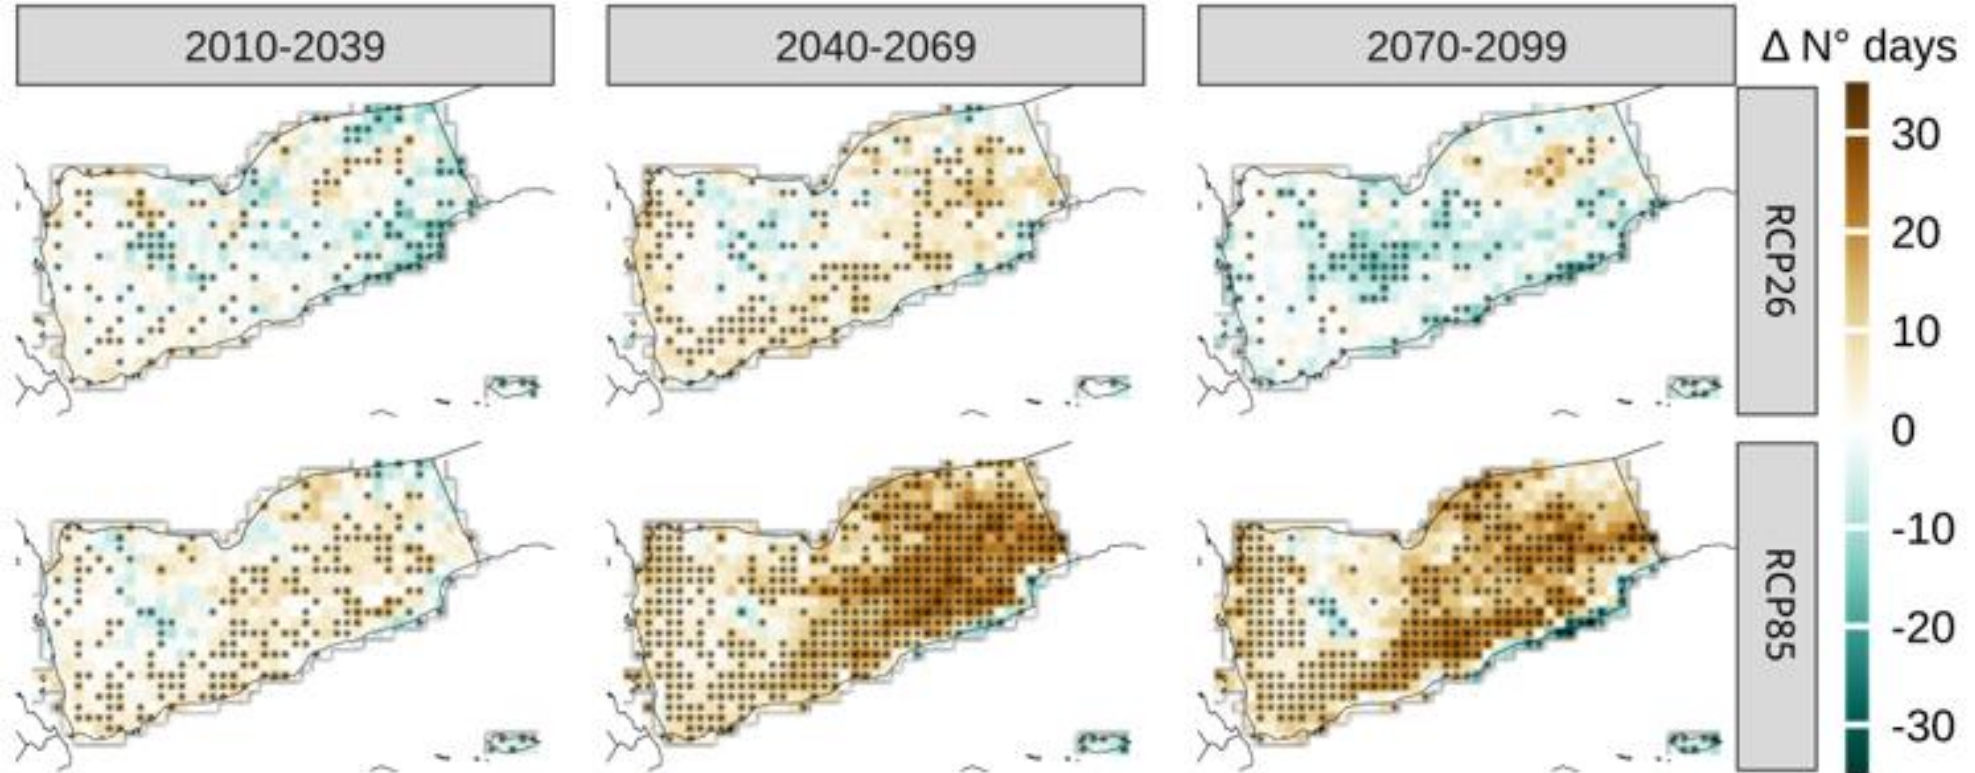

Future climate (2010-2099): precipitation-based indicators

DRY DAYS

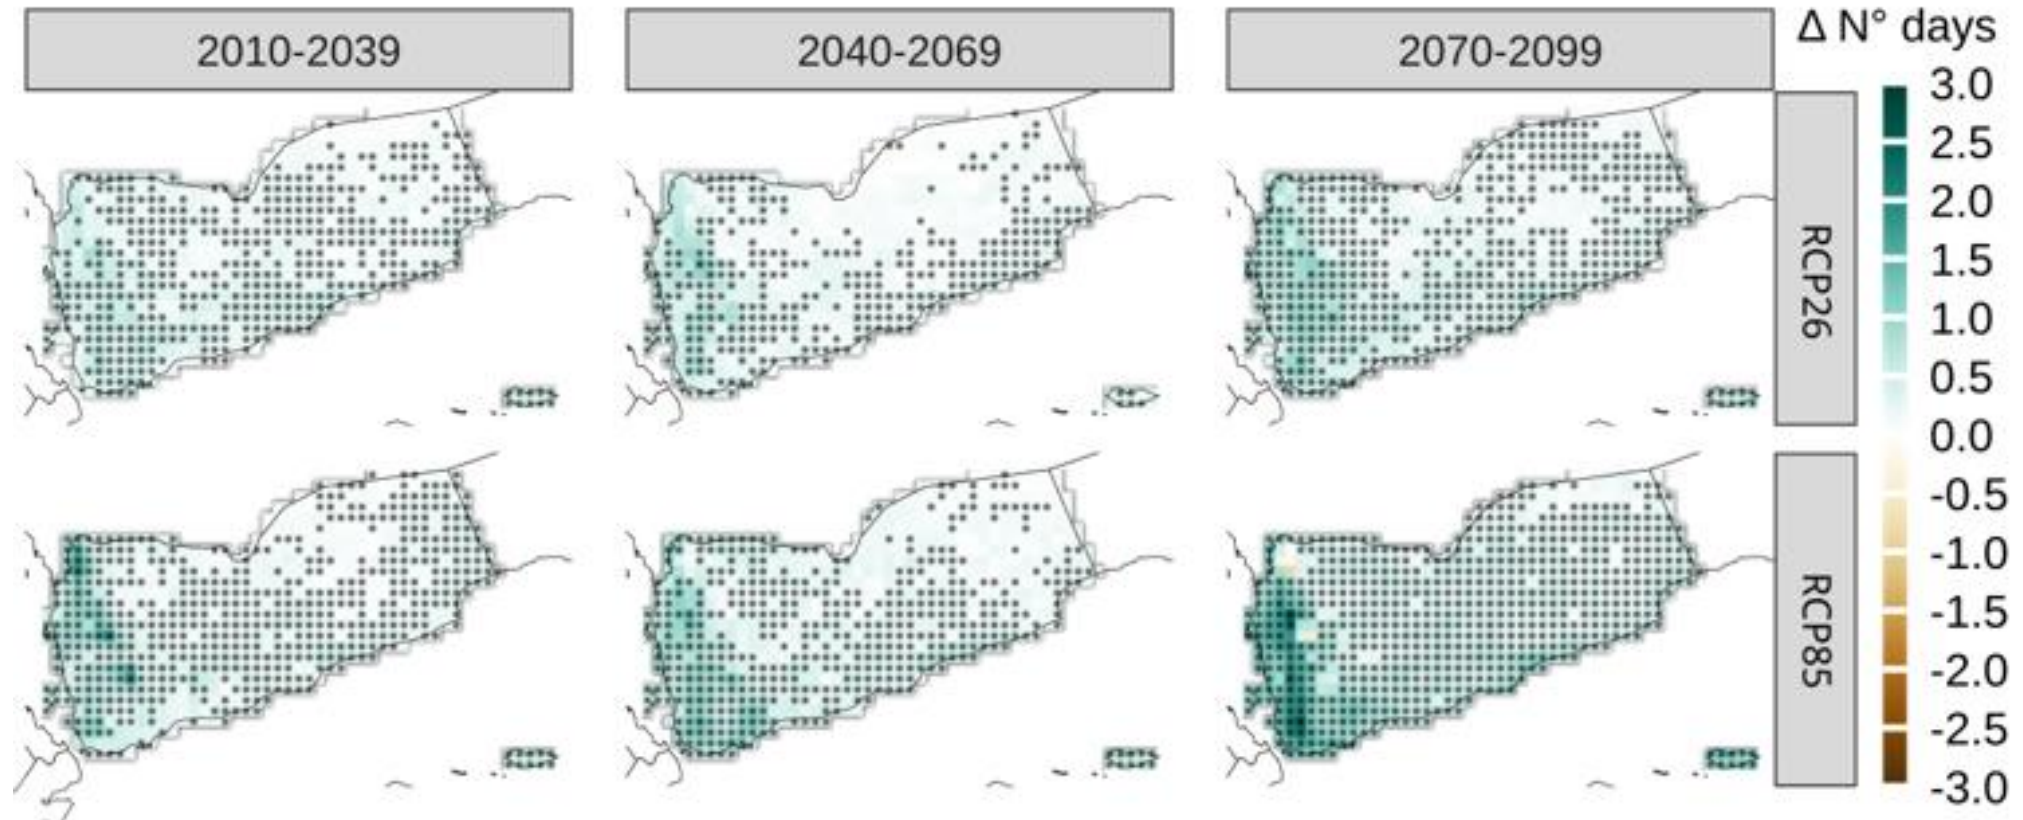

Future climate (2010-2099): precipitation-based indicators

CONSECUTIVE DRY DAYS

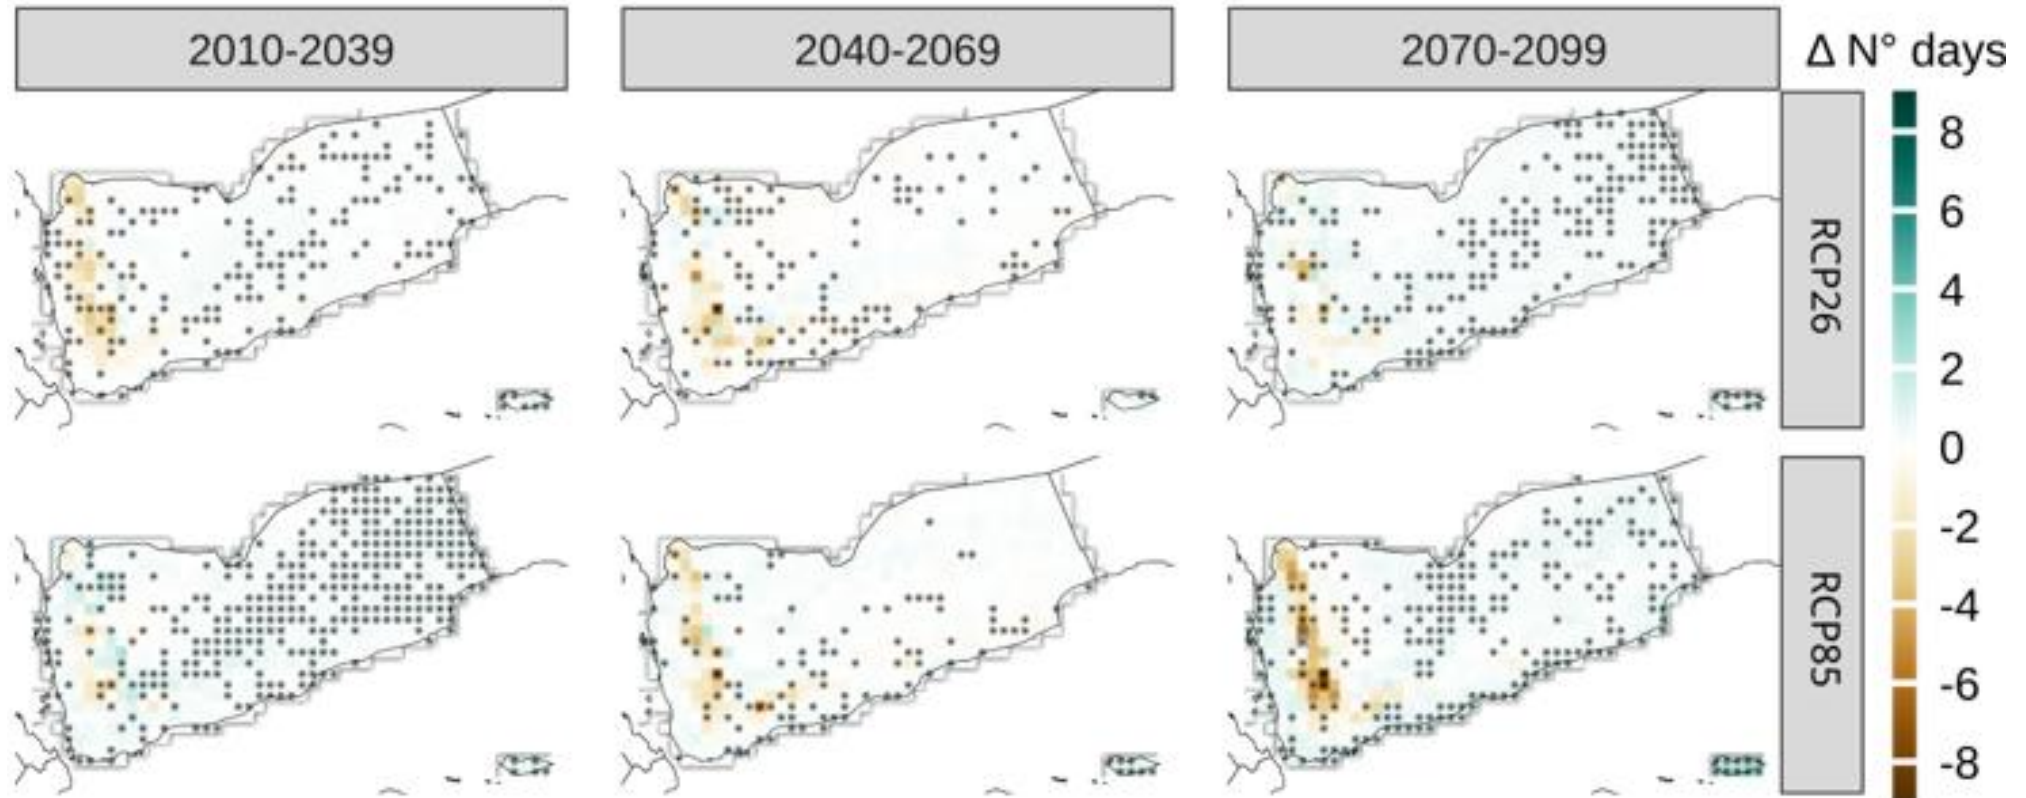

Future climate (2010-2099): precipitation-based indicators

HEAVY RAIN

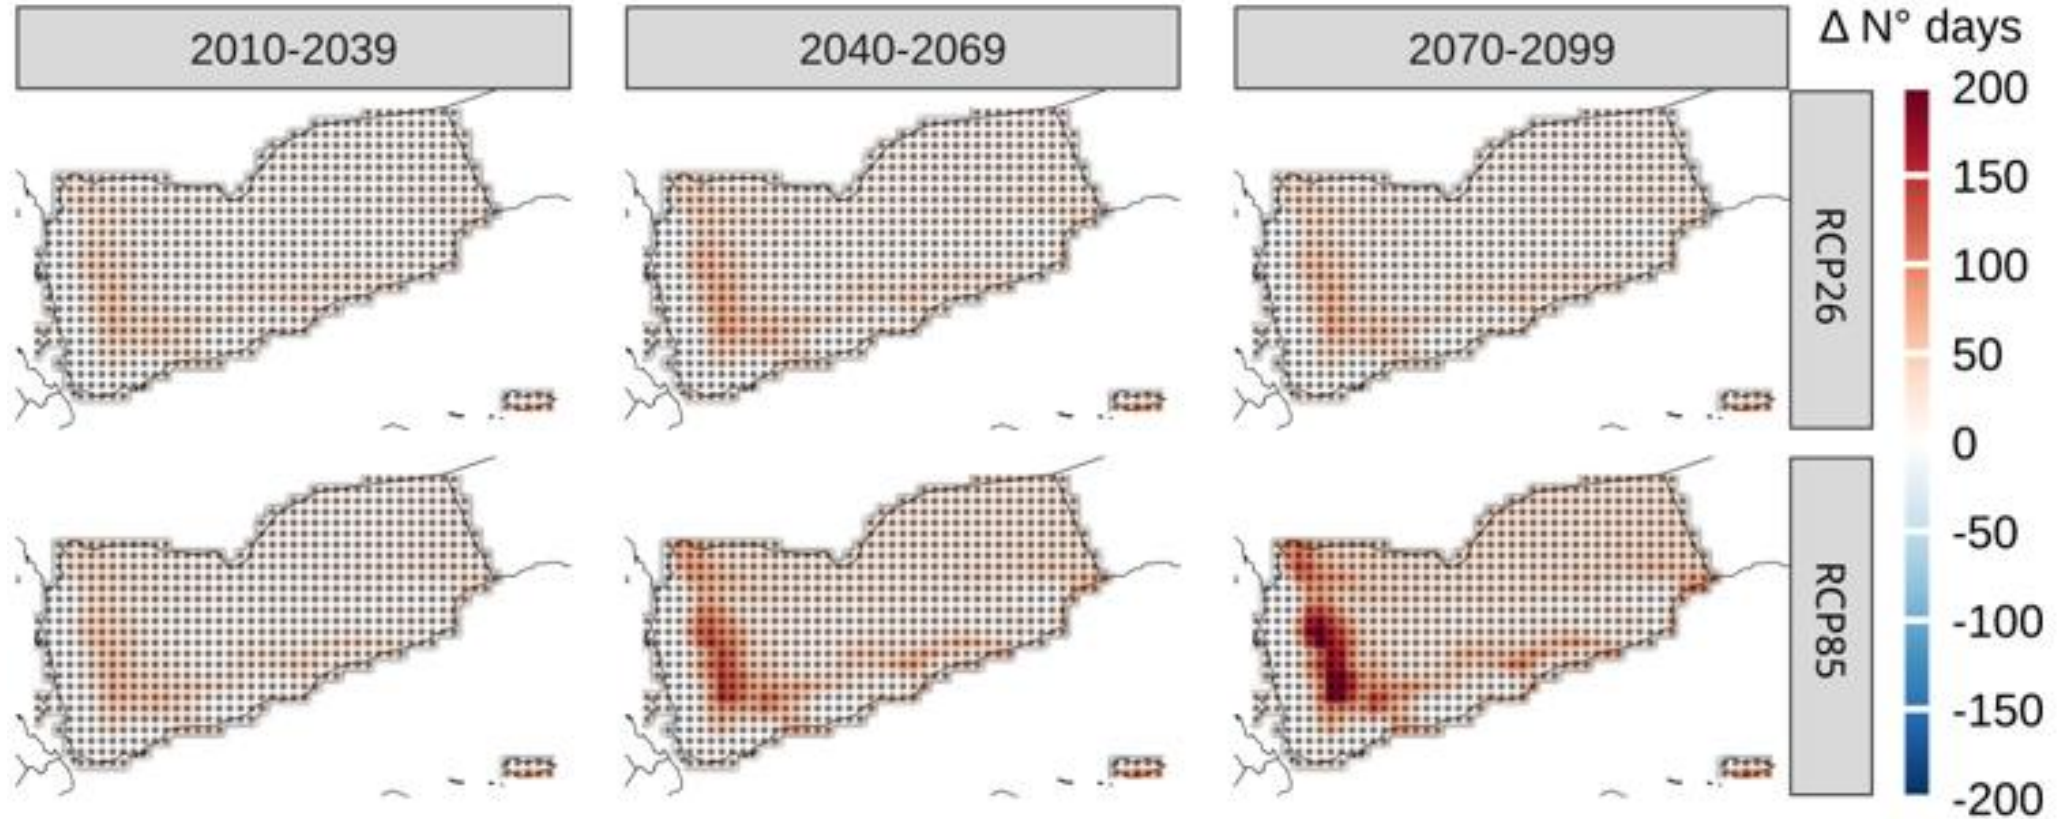

Future climate (2010-2099): precipitation-based indicators

CONSECUTIVE WET DAYS

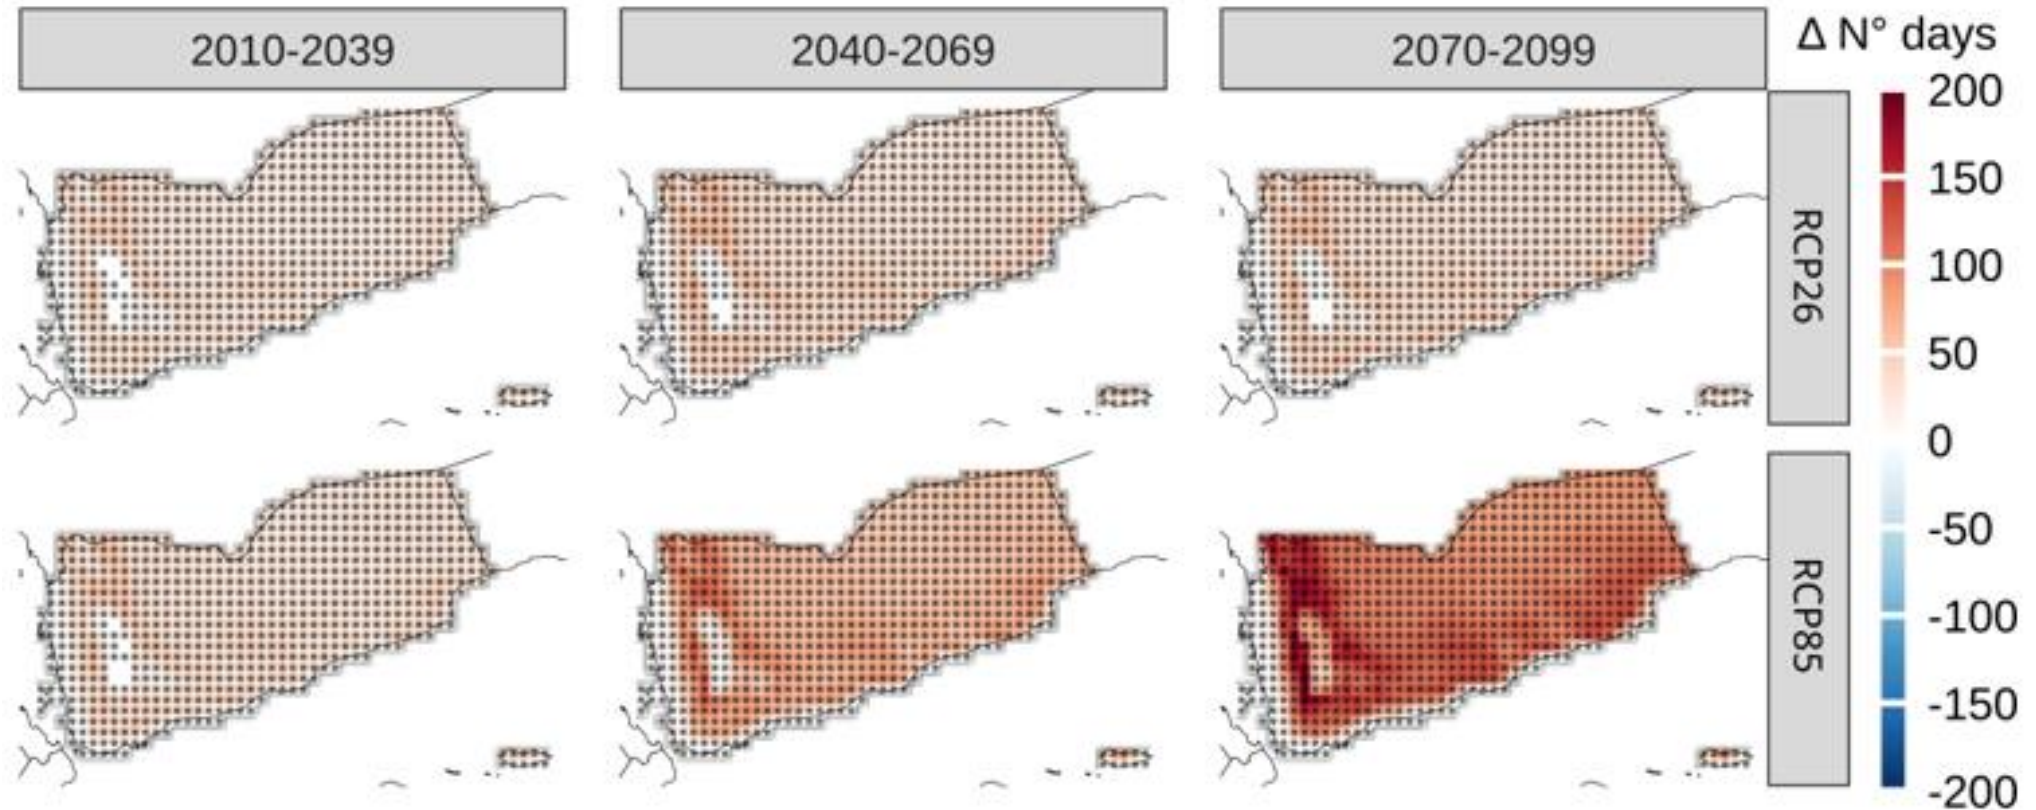

Future climate (2010-2099): temperature-based indicators

SUMMER DAYS

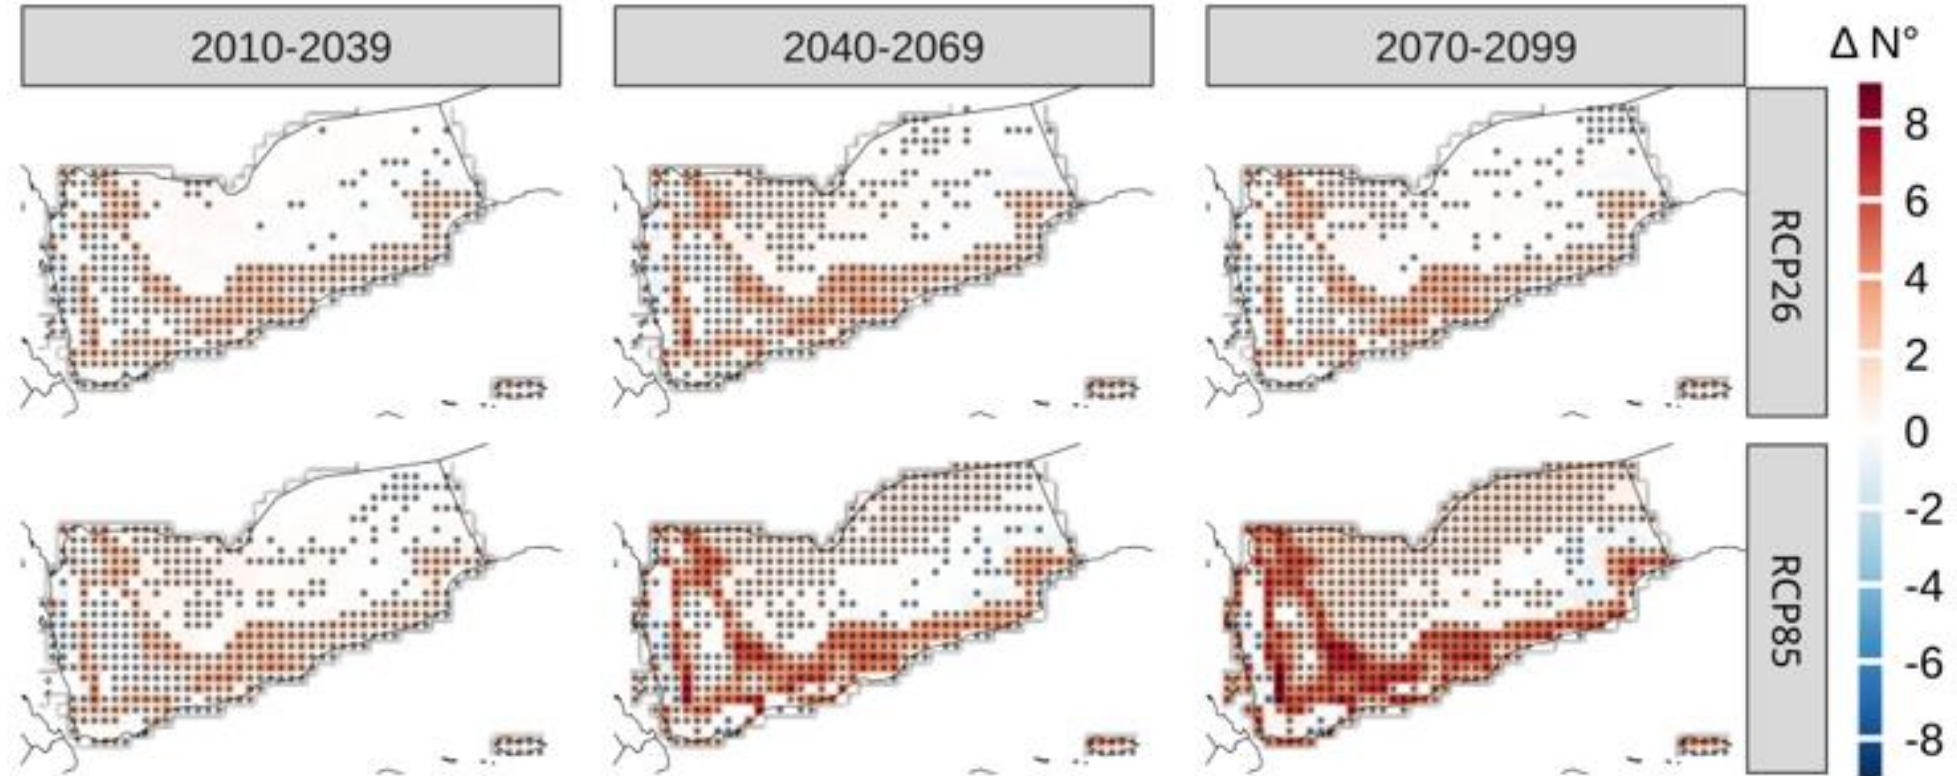

Future climate (2010-2099): temperature-based indicators

TROPICAL NIGHTS

Future climate (2010-2099): temperature-based indicators

HEATWAVES DAYS

The end!
